

ZOETIS, HERE TO SUPPORT YOU, SUPPORT YOUR CUSTOMERS.

Zoetis, especially since the onset of the COVID-19 pandemic, has been thinking about how we can support our veterinary customers and the financial health of your practice.

We are now positioned to help customers by sponsoring the opportunity for you to stay open virtually when, in many instances, you may have to close your business other than to perform specialty emergency services. We know from experience in both human and animal health that telemedicine can help in this way. The demand to keep animals healthy continues even during the pandemic. **Our goal at Zoetis is to be a helpful partner to you!**

Zoetis has partnered with two **telemedicine platforms** to help you during this time and to give you a choice. **Vet-AI (Joi)** and **Video With My Vet**. Both are offering a special discount for Zoetis Customers.*

Unlike with consultations using FaceTime and WhatsApp, these telemedicine platforms will enable veterinary practices like yours to capture value from the virtual consultations with your existing client on their smartphones, so that effectively, the client can take the vet to their animal. These platforms conform to the developing telemedicine guidelines for the UK outlined by the RCVS.

There are two slightly different propositions to choose from; one supporting staff consultations and triage; the other providing a platform so practices can charge for virtual consultations; both systems support prescribed medicines to be shipped via **VetPost** for home delivery. **These approaches can help the financial health of your practice for now and for the future.**

Review and choose a provider that suits you the most should you need any help or support. The promotion is being offered from **1st May through to July 30th, 2020**. This means that if you enrol during that period you will receive discounts for three months beginning upon the date of enrolment. So, if you join on 1st May, you will receive this support for 3 months from that date. This offer is available for use with one of our two partners listed below.

OUR TWO CHOSEN PARTNERS ARE:

Video With My Vet is an app designed for all practice types (Companion Animal, Equine, Livestock, First Opinion or Referral) enabling owners and their pets or animals to see their very own vet at home – no travel, no trouble.
