

CYDECTIN 0.1%

Oral Solution for Sheep

CYDECTIN 0.1% Oral Solution for Sheep treats ewes where persistent worm control is needed and where scab is NOT a concern.

It offers persistent activity against worms with a short meat withdrawal and helps to reduce worm spring rise in ewes, helping to protect lambs.

CYDECTIN 0.1% Oral Solution for Sheep maximises growth rates in lambs with minimal handling, cost and selection for resistance, and allows an opportunity for marketing lambs not hindered by frequent dosing.

CYDECTIN 0.1% Oral Solution for Sheep has the only active ingredient to offer all these benefits:

- Treats and prevents common sheep roundworms, including lungworm and *Nematodirus* treatment
- Up to 5 weeks persistency
- Allows a dosing interval of up to 8 weeks
- Short meat withdrawal of 14 days

moxidectin
