

CYDECTIN TRICLAMOX

Oral Solution for Sheep

FOR MIXED INFECTIONS OF FLUKE AND WORMS

In many flocks with either high infection levels or inappropriate autumn/winter treatments, it is important that ewes are treated with a flukicide to minimise pasture contamination. CYDECTIN TriclaMox provides an effective treatment in these flocks because it treats all stages of fluke whilst providing a persistent wormer to reduce the worm spring rise. Only CYDECTIN TriclaMox can deliver an effective fluke treatment AND persistent activity against worms.

CYDECTIN MOXIDECTIN **TRICLAMOX** TRICLABENDAZOLE
Worm and Fluke for Sheep

CYDECTIN TRICLAMOX 1 MG/ML + 50 MG/ML ORAL SOLUTION FOR SHEEP contains moxidectin and triclabendazole. For the treatment of mixed nematode and fluke infections in sheep, caused by moxidectin and triclabendazole sensitive parasites in sheep. [PCMV-VPS 0-ML](#)
